

Confronting the energy crisis: changing behaviours to reduce energy consumption

Category: Energy

written by oecdecoscope | April 17, 2023

Households react to prices as well as habits, expectations and biases. Energy saving measures should factor in these behavioural aspects.

Emergency plans and solidarity: Protecting Europe against a natural gas shortage

Category: Energy

written by oecdecoscope | April 17, 2023

Rationing and solidarity can serve as last resort, but energy must be saved across all sectors of the economy in the face of Russian gas exports cuts.
