

The social exclusion of Roma in the Slovak Republic calls for immediate policy action

by Gabriel Machlica, Slovak Republic Desk, OECD Economics Department

The Slovak Republic has one of the continent's largest Roma populations. Estimates differ, but it is assumed that they account for about 8% of the population. The Roma communities vary based upon geographic location and the level of integration. Nevertheless, the average level of ethnic segregation is exceptionally high and Roma face social exclusion in almost every aspect of everyday life (Table

1.1.).

Table 1. Selected indicators of Roma exclusion in Slovakia

	General population	Roma
At-risk-of-poverty rate (%)	13	87
Employment rate, 20-64, (%)	68	25
NEET rate - neither in work nor in education, aged 16-24, (%)	14	65
Drop-out rate from education, (%)	7	58
Share of households living without a toilet, bathroom and shower inside the dwelling	0.6	43
Share of households living in areas affected by crime, violence and vandalism	8.7	30

The Roma can be trapped in a cycle of poverty for generations. If a child starts her or his life with limited access to education and lives in poor housing conditions, there is a high probability she will end up in poverty too. Indeed, results for Roma show exceptionally weak upward social mobility between generations. The probability that Roma born in concentrated residential area become unemployed or earn less than minimum wage in irregular work is almost 70%.

Figure 1. Intergenerational mobility of Roma living in concentrated residential areas is low
Probability of being unemployed or earning less than a minimum wage according to parents' economic and ethnic status

Investment in Roma integration cannot only help improve the well-being of disadvantaged groups, but also yield positive fiscal returns from improved employment prospects. The Economic Survey of the Slovak Republic shows that increasing the Roma employment rate and their productivity to the level of the general population by the end of 2060 would increase GDP by more than 12% with the economy growing faster on average by 0.3 p.p. per year.
